<h3>

Status for week ending 4/2/2001</h3>

1. Implemented a workaround for the recently found bug in VL5 plugin. If two users sign in from a web browser in succession, this bug results in the second user being authenticated as the first user. The problem is caused by a authentication cookie set by the VL5 plugin when the first user logs in; this cookie is not regenerated when a second user logs in, but is instead reused, resulting in the second user being authenticated as the first. The workaround clears the VL5 cookie during logout from Shopping List; a new cookie is then generated by VL5 when a new user logs in. After this workaround is tested on QA server, installation of Shopping List Release 1.1 on production servers will be scheduled.

2. I started installing and running the Search service on a new UltraSparc machine; I could not run Search on my Sparc20 system, landscape, because Search software requires UltraSparc systems.

The DCI team has not yet implemented the proximity search interface and are also yet to send us the DCI Franchise lds for the initial list of Local Store merchants.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

<br>>2. Work on implementation of&nbsp; Local Stores.

<br/><br/><br/><br/>Support CTA Banner service and Shopping List.</html>
